María Valls, Antoni M. Grau, **Enric Massutí**, **Aixa Tobaruela** and Francisco Riera (2011). **First record of *Seriola rivoliana* (Osteichthyes: Carangidae) in the western Mediterranean.**
Marine Biodiversity Records, 4 , e91 doi:10.1017/S1755267211000753

Abstract: The capture of three specimens of *Seriola rivoliana* is reported from Mallorca (Balearic Islands). It represents the first report of the species in the western Mediterranean and the fourth and fifth for the whole Mediterranean. Morphometric and meristic measurements are provided, and the presence of this species and other Atlantic migrants of the genus Seriola in the Mediterranean are discussed.

Keywords: *Seriola rivoliana*; Carangidae; first record; Balearic Islands; Mediterranean
